Professional Summary

Full-Stack Web Developer with 10+ years of experience building, customizing, and maintaining websites and web applications. I work across the full stack, with strong experience in PHP, Laravel, WordPress, WooCommerce and JavaScript.

I specialize in custom WordPress themes and plugins, API integrations, website performance, SEO, and turning complex requirements into reliable, easy-to-use solutions. I'm comfortable working independently or as part of remote teams, and I focus on writing clean code, solving problems efficiently, and building solutions that deliver real business value.

Core Skills

- **Full-Stack Web Development** — Building complete, modern websites and web applications from frontend to backend.
- **PHP & Laravel** — Developing custom backend systems, APIs, authentication, and database-driven applications.
- **WordPress Development** — Creating custom themes and plugins, working with Gutenberg, Elementor, WooCommerce, and complex WordPress customizations.
- **WooCommerce** — Building custom ecommerce features, payment integrations, product systems, and flexible pricing solutions.
- **JavaScript Development** — Creating interactive interfaces, API integrations, and dynamic frontend functionality with modern JavaScript.
- **Frontend Development** — Strong foundation in HTML5, CSS3, responsive design, Bootstrap, Tailwind CSS, and modern UI implementation.
- **API Development & Integration** — Designing REST APIs and connecting websites and applications with third-party services, payment gateways, and external systems.
- **Website Performance Optimization** — Improving Core Web Vitals, page speed, caching, image delivery, and overall website performance.
- **SEO-Friendly Development** — Building technically sound websites with semantic markup, structured content, and search-friendly architecture.
- **Website Maintenance & Troubleshooting** — Handling bugs, security updates, server issues, performance problems, and ongoing website maintenance.
- **Database Development** — Working with MySQL, database design, complex queries, optimization, and application data management.
- **Linux & Server Management** — Managing Ubuntu servers, Nginx, SSL, deployments, server configuration, and hosting environments.
- **Git & Development Workflow** — Using version control, deployment workflows, debugging practices, and collaborative development processes.
- **Problem Solving** — Breaking down complex requirements and existing systems into practical, reliable, and maintainable solutions.

Professional Experience

Full-Stack Web Developer

Freelance / Independent Developer | 2015 – Present

I work independently with businesses and individual clients to build, improve, and maintain websites and web applications that are reliable, fast, and easy to use.

- Build custom WordPress websites, themes, plugins, and WooCommerce solutions tailored to each client's needs.
- Develop backend systems, REST APIs, authentication, and database-driven applications using PHP and Laravel.
- Create modern, responsive interfaces and interactive applications with JavaScript.
- Customize and extend existing WordPress, Gutenberg, Elementor, WooCommerce, Laravel, and other web-based systems.
- Connect websites and applications with third-party APIs, payment gateways, and external services.
- Troubleshoot and resolve complex issues involving websites, applications, databases, hosting, and servers.
- Improve performance through cleaner code, caching, database optimization, image optimization, and Core Web Vitals improvements.
- Build responsive, mobile-first websites with a strong focus on usability, accessibility, and SEO.
- Handle website migrations, SSL setup, deployments, backups, server environments, and ongoing maintenance.
- Work directly with clients to understand their goals, recommend practical solutions, estimate project requirements, and manage delivery from start to finish.
- Maintain and improve existing applications with a focus on security, compatibility, performance, and long-term stability.

Education

Master of Arts (MA)

National University (Govt. Tolaram College, Narayanganj)

Graduation Year: 2021

Major: English

Language

- Bengali (Native)
- English (Proficient)
